Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to an isolated DNA, chimeric gene comprising said DNA and a promoter and transformed plant, classified in class 536, subclass 23.1 and in class 435, subclass 414.
- II. Claims 21-23, drawn to a method for modulating the metabolic state of a plant, classified in class 435, subclass 69.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)).

The invention of group I is drawn to an isolated DNA, a chimeric gene comprising said DNA operably linked to a promoter, a transformed plant cell, and a transformed plant. The invention of group II is drawn to a method for modulating the metabolic state of a plant. These inventions are unrelated because the invention of group I does not require the same considerations that the invention of group II does. Group I is simply drawn to DNA and the DNA once it is in a plant cell. The invention of group II relates to manipulating complex biological processes. Because the product of group I can be used in a materially difference

Art Unit: 1636

process, i.e. to make recombinant ADP-ribose polymerase, restriction between the groups is proper. For this reason, the inventions are unrelated.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. These inventions have acquired a separate status in the art as shown by their different classification rendering restriction for examination purposes as proper.

Conclusion

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
